

Crack the Coordinates

Find these three coordinates in the grid below: (2, 5) (6, 3) (3, -5)

Each coordinate will lead you to a symbol.

The symbols are code for numbers – have a look at the bottom of the sheet.

Put the numbers in the same order as above to reveal the code for the blue padlock.

Use the code below to turn the symbols into numbers:

$$\phi = 1$$

$$\xi = 2$$

$$\Omega = 3$$

$$\pi = 4$$

$$\alpha = 5$$

$$\beta = 6$$

$$\delta = 7$$

$$\theta = 8$$

$$\psi = 9$$

$$\omega = 0$$
